zepcam™
PROFESSIONAL BODYCAM SOLUTIONS

With ZEPCAM You'll Never work alone

Unexpected situations occur all the time on patrol. It is part of the police job. There are yearly increases of the number police officers being threatened or abused, with thousands experiencing escalations. This requires immediate actions to be supported through efficient, indisputable evidence afterwards. In order to effectively protect officers and prosecute criminals. The bodycams records and supports what the officer has seen, heard and experienced. The ZEPCAM system has livestreaming capabilities to enable real-time, centrally coordinated decisions for optimal frontline operations. With legal evidence and operational data for justice to be done.

Local law enforcers experience threats or violence while working on the frontline on a daily basis, with on average 3 assaults weekly in the Netherlands and 10% yearly increases in Germany. Bodycams have proven to prevent and de-escalate **more than half** of the incidents wherein unlawful behaviour is being addressed. This leads to safe and peaceful conclusions to law enforcement actions. The bodycams completely record indisputable video, audio and GPS evidence of incidents, from before the start button is pressed. Leading to better, safer and more rewarding working conditions for all officers. The recorded footage ensures effective and efficient law enforcement for the whole justice chain. Where necessary, livestreaming enables immediate support and actionable data.
